Flexible, Cost-Effective Workhorse

The XT3215 is designed for environments when cost and performance is a critical factor. Even though the XT3215 has exceptional price / performance, its quality has a foundation in the long legacy of Posiflex field-tested reliability.

The XT3215 base folds and configures to an optimal angle, height and space, with the option of upgrading to a PoweredUSB base for reduced cable clutter or an 8-port USB hub. The multifunctional base can house the terminal power brick, and with the PoweredUSB eliminate the need for a printer power brick additionally. The low-profile design fits in the tightest of spaces, reducing shipping costs up to 40%. With this sleekly designed fan-free exterior comes the Intel D525 1.8GHz dual core power to run many applications for hospitality, retail, health care and more.

The XT3215 is spill and dust resistant, and features an Intel D525 1.8GHz dual core, 4GB standard DDR3 RAM and a 15" resistive touch TFT LCD touch screen terminal. Along with a rich array of connectivity features are options for a mini-PCIe slot for WiFi and VESA wall mount bracket.
